Skills

Python

FastAPI

React

OpenCV

Scikit-learn

Pandas

NumPy

MySQL

AWS S3

Twilio

Git

Java

JAX-RS (Jersey)

Apache Tomcat

Profile

Second-year Computer Science undergraduate with a strong foundation in object-oriented programming, backend development, and database systems. Hands-on experience building Java desktop applications, RESTful APIs using FastAPI, and introductory machine learning models. Seeking an internship or trainee role to apply and strengthen software engineering skills.

Education

BSc (Hons) Computer Science

IIT(University of Westminster), Sri Lanka

2025 - Present

AI and Data Science Higher Diploma

DLC Sri Lanka, Sri Lanka

2026 - Present

O/L , A/L(bio science stream)

C.W.W.Kannangara Central Collage, Mathugama

2015 - 2023

Projects

Backend & ML Developer, Healix Pharm

Built RESTful backend services using FastAPI, developed ML models for medicine co-occurrence prediction, integrated WhatsApp-based workflows via APIs and webhooks.

Technologies: Python, FastAPI, React, OpenCV, Scikit-learn, Pandas, NumPy, MySQL, AWS S3, Twilio, Git

Omi predictor

Built an image processing system using OpenCV and ML models, developed backend with FastAPI for handling image workflows.

Technologies: Python, FastAPI, OpenCV, Scikit-learn, Pandas, NumPy, Git

SmartCampus REST API System

Developed a RESTful API to manage rooms, sensors, and readings with CRUD operations, filtering, and sub-resources.

Implemented business rule validation, centralized error handling, and request/response logging, deployed on Apache Tomcat. Technologies: Java, JAX-RS (Jersey), Apache Tomcat, Maven, Python, Postman

Machine Learning Loan Prediction System

Built a dual-stage ML pipeline to predict loan approval and estimate loan amounts.

Performed data cleaning, feature engineering, and exploratory analysis, and implemented optimized classification and regression models with interpretable outputs. Technologies: Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

Medical Management System (MMS) -JAVA HTML

Designed a desktop application using OOP principles, implemented GUI, database connectivity, and CRUD operations.

Technologies: Java, Java Swing, JDBC, MySQL

Simple-post-and-comment-platform

Developed a simple API with relational models and CRUD functionality.

Technologies: Python, FastAPI, SQLAlchemy, SQLite/MySQL, Git

Certifications and Licenses

Machine Learning with Python – IBM

Mastering REST APIs with FastAPI – Packt

Maven

Postman

JavaScript

Matplotlib

Seaborn

Java Swing

JDBC

HTML

CSS

SQLAlchemy

SQLite

Analytical thinking

Problem solving

Adaptability
